Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 10/587,743	Applicant(s) SEHLSTEDT ET AL.	
	Examiner CHRISTOPHER SCHATZ	Art Unit 1791	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-15, drawn to a press.

Group II, claim(s) 16-18, drawn to a method.

The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The common technical feature shared between the Groups do not make a contribution over the prior and thus said common technical features do not qualify as special technical features. Evidence that the shared common technical features do not make a contribution over the prior art can be found in FR 2463078 (of record).

2. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

Art Unit: 1791

Group A:

Species A1: wherein the cylindrical element is a force absorbing body, claims 1, 3, 4, 6-14 and 17

Species A2: wherein the cylindrical element is a liner, claims 5 and 18.

Group B:

Species B1: wherein the prestressing device is at least one of a wire-shaped and band-shaped, claim 6.

Species B2: wherein the prestressing device is cylindrical and shrunk on the outer envelope surface, claim 7.

Group C:

Species C1: wherein the cross-sectional area of the tunnel-like passage is dimensioned to conduct a pressure medium flow essentially equal to or larger than the flow of pressure medium supplied into the pressure chamber by a pumping device, claim 8.

Species C2: wherein the cross-sectional area of the tunnel-like passage is dimensioned to conduct a pressure medium flow lower than the flow of pressure medium supplied into the pressure chamber by a pumping device, claim 9.

Group D:

Species D1: wherein at least two tunnel like passages run parallel with each other, claim 12.

Species D2: wherein the at least tunnel like passages intersect each other, claims 13 and 14.

Applicant is required, in reply to this action, to elect a single species from each of the above Groups to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

The following claim(s) are generic: claims 2 and 16.

The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for at least the following reasons: the common technical feature shared between the Groups do not make a contribution over the prior and thus said common technical features do not qualify as special technical features. See discussion above.
